Crema, May 2009

Dear Parents,

The Municipality of Crema, in order to get closer to the specific needs of Citizens, especially for families with young children, is launching a pilot project named "Times of the Cities"

"Times of the Cities" is an innovative project, whose main objective is the construction of a city more equitable, more efficient, more harmonious than in the days of living, working, care, training and report, both of whom live permanently on territory, continuously or occasionally using space in the city.

In order to enable targeted actions corresponding to real needs of your family, we kindly ask you to fill out the format you find here in attachment, about the extra school activities in which your children are involved.

We are sure that a good information and sharing of projects are the first step for the development, growth and good administration of the city.

Thanks for your kind cooperation,

The Municipal Councilor
(dr.ssa Mia Miglioli)

The executive
(dr. Angelo Stanghellini)
